We have received notification that you are switching to a new supplier for your electric energy needs as noted above. ComEd will be your provider of delivery services (the facilities including poles, transformers and wires which carry and distribute the electricity provided by your electric supplier).

On the date of your switch, please provide access to your meter(s) so that they can be read. The effective date is the date your new electric supplier provides you with electric supply service.

If you move in the future, you must notify ComEd to assure uninterrupted delivery services at your new premises. In addition, you must also contact your Retail Electric Supplier to continue service with that supplier.

If you have any questions or require additional information regarding your new electric supply service, please contact your new electric supplier. If you have any questions regarding delivery services, please contact a ComEd Customer Service Representative at 1-800-Edison-1 (1-800-334-7661) if you are a residential customer or call ComEd's Business Customer Service Center at 1-877-4-ComEd-1 (1-877-426-6331) if you are a non-residential customer.

Thank you,

ComEd
